CSCI 4485 – Software Engineering
Team Project – Milestone #3

In this milestone, each team should make significant progress (i.e. most of the requirements) in implementation.

What to Hand in

1. Each team: please submit a report (template attached) including
   - Updated requirements from your client (if any)
   - database design (if any)
   - The set of requirements you have completed in this milestone.
   - The link of github repository having your source code. (Everyone should contribute at least three commits on three different days).
   - Team Report Form
   - Meeting minutes

   Note: Each team/group will give a project demo after the milestone deadline.

I. **Marks** for this assignment will depend on the following factors:

   1. Report and software delivery (60%)
   2. Project Demo (30%)
   3. Meeting minutes (5 %)
   4. Team Effort Report Form (5%)

Team Report Form

(must be submitted with assignment)

Description of roles and contributions of each team member:

Anthony D'Alessandro
- Compilation of meeting minutes (team & client)
- Architectural styles (Report 7.1)
- Tables (Report 7.2.2)
- Implementation (Report 8.1)
- GitHub Link (Report 8.2)
- Roughly 40% of Python code (Logic layer)
- Overall compilation of documents/editing

Yash Maisuria
- Code to create 'employees' table
- Code to create 'users' table
- Code to create 'invoices' table
- Code to create 'jobreport' table
- E-R Diagram
- Ideas for future expansion to help organize invoices
- Made sure database followed normal form rules
- Assisted in Python troubleshooting
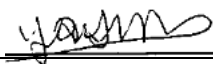

Scott Kinnie
- General ideas/design of database tables
- Roughly 60% of Python code (logic layer)
- Created/edited some HTML code when necessary

Pooja Shah
- Creation of the majority of HTML files
- Creation of the majority of CSS code
- Overall front-end design
- General input for project logic/design

Mouaz Ali
- Code to create 'employees' table
- Code to create 'users' table
- Code to create 'invoices' table
- Code to create 'jobreport' table
- E-R Diagram
- General ideas for major project functionalities
- Ideas for expanding database to accommodate future functionalities

Name	% of Effort	Signature
Anthony D'Alessandro	22.25%	*(signature)*
Yash Maisuria	18.5%	*(signature)*
Scott Kinnie	22.25%	*(signature)*
Pooja Shah	18.5%	*(signature)*
Mouaz Ali	18.5%	*(signature)*
